

July 2010

News and Developments at BDAS, LLC.

Radar chart from New Fully Computerized Sensory Ballot Software

» Catching Up and Reestablishing Database: A computer crash at Christmas led to a loss of E-mail contacts and it took a while to reset the database. We have not had much time to update the website but see below.

» New website. A new website went live this time last year: www.alcbevtesting.com.

» Publications: Barry Starcher and Gary Spedding had a publication on FAN assays and beer protein determination in J. Institute of Brewing late in 2009. An oral presentation was made by Gary at the ASBC Meeting in June 2009. [See website for details]

» Several articles have been prepared for the Oxford Companion to Beer to be published by Oxford University Press under the editorship of Brooklyn Brewery's G. Oliver.

» Gas Chromatography: BDAS, LLC has installed a new GC system and is now running Higher Alcohols and Esters at the Lexington Laboratory Facility. This will expand to energy components such as taurine and caffeine and also to phenols and other components shortly. Our collaboration with Oregon State University (billing through BDAS, LLC) now includes VDK (Diacetyl) analysis as well as the DMS work they already do for us. [Contact us for details.]

» BDAS, LLC is proud to announce that we are now TTB certified for both Distilled Spirits and (recertified) for Wine Analysis (Certificate copies shown to the right).
